Thank you for your purchasing of THE LAST BLADE 2™. Please note that this software is designed only for use with the Sega Dreamcast console. Be sure to read this instruction manual thoroughly before you start playing THE LAST BLADE 2™-Heart of the Samurai.

Using the Sega Dreamcast Controller

Here is an introduction of basic controller commands during game battles and various select screens. Try the separately sold Arcade Stick for the Sega Dreamcast to experience the same thrills and feel of arcade play.
*To return to the title screen at any point during game play, simultaneously press and hold the A, B, X, Y and the START buttons. This will cause the Sega Dreamcast to soft-reset the software.

SEGA DREAMCAST HARDWARE UNIT

*The Last Blade 2 is a 1-2 player game. Before turning the Sega Dreamcast power ON, connect the controller or other peripheral equipment into the control ports of the Sega Dreamcast.

*When the Jump Pack is inserted into Expansion Socket 1 of the Sega Dreamcast Controller, the Jump Pack connects, but does not lock. If the controller is jarred, the Jump Pack may fall out during game play or otherwise inhibit game operation.
*Be sure to refer to the instruction manual for the "Jump Pack" for proper installation procedures.
VS MODE SCREEN

Character Name:	Name of the player's character (or opponent character).
Power Gauge:	Displays the amount of remaining power. If player loses power, the power gauge will blink red. (You lose if you lost all power.)
Remaining Time:	Shows the time limit remaining for one round. The round is over when the gauge reaches zero (0:00) time. The player who has a higher power gauge wins the match if the fight is a draw when the time reaches zero.
Sword Gauge:	Gauge increases with each attack to opponents (even if opponents are in a Guard position), and enables the use of Super Secret Slice when it reaches MAX. (See page 6)
Sword Type:	Displays selected Sword Type (See page 7)

GAME SYSTEM

All commands here are described for characters facing toward the right of the screen. The "→" symbol shows which direction of the Directional button to push. All button commands are described in their initial settings.

◆◆ **SPECIAL MOVES** ◆◆

Dash*	→→	**Short Reach, Weak Slash**	← + A button
Dash Jump	During dash ↗	**Long Reach, Strong Slash**	→ + X button
Small Dash Jump	During dash briefly ↗	**Tripping Kick**	↘ + B button
Back Step	←←	**Blast Kick**	→ + B button
Small Jump	Briefly ↖ / ↑ / ↗		

* **Depending on the character, this move becomes a Front Step.**

◆◆ **REPEL** ◆◆

Press the Y button before the attack hits.

Repel consists of three positions: Standing, Sitting, and Aerial position. Standing Repel is for Jump or middle posture attacks, Sitting Repel is for lower posture attacks. The opponent freezes for a moment and his/her guard is down if the Repel is successful. (Depending on the speed that some characters have, Repel may not work against your opponent.)

◆◆ **NO GUARD SLICE/LAUNCHING SLASH** ◆◆
Press the B & X button simultaneously.

If you select [POWER] sword type, No Guard Slice is playable by pressing the B and X buttons simultaneously. If you select [SPEED] and [EXTREME], Launching Slash (middle posture) is invoked.

◆◆ DASH ATTACK ◆◆

Upper posture attack by pressing the A (or B) buttons during dash. Lower posture attack by pressing↘ + the A (or B) buttons during Dash.

Upper posture attack is done by pressing the A (or B) buttons during dash. Lower posture attack is done by pressing↘ + the A (or B) buttons during dash. This dash attack does not invoke right away, therefore, it's better to keep some distance from your opponent while using the attack.

◆◆ SUPER SECRET SLICES ATTACK ◆◆
This is invoked by pressing the character's special move when power gauge becomes less than 1/4 or sword gauge reaches MAX condition.

This movement of attack power has a much higher power than other moves, even enough power to turn the tide of the battle completely. See Character and Special Moves (page 17) for the commands of individual characters.

◆◆ AERIAL GUARD/KNOCKDOWN RECOVER ◆◆

Press the Y button while being thrown out.

Press the Y button for aerial guard when you are hit and being thrown out to aerial. Press the Y button for Knockdown Recover at the moment when you are hit and being thrown to the ground. Your guard is open after these actions.

SWORD TYPES

There are three types of swords that reflect the characters' performance in this game.

◆◆ POWER ◆◆

By selecting POWER, the sword will be sharpened up stronger, even to able to damage a guarded opponent character.

◆◆ SUBLIME SLASH ◆◆

Links certain "Super Slice" moves to "Super Secret Slice" attacks.
Not all "Super Slice" moves can be linked to "Super Secret Slice". Find out which "Super Slice" moves can be linked by yourself.

◆◆ HIDDEN SECRET SLICES ◆◆

Enabled to invoke by pressing the character's special move when power gauge becomes less than 1/4 and sword gauge reaches the MAX condition.
Hidden Secret Slices are more powerful than Super Secret Slices.

◆◆ SPEED ◆◆

This type makes movement more quick and technical. By selecting the SPEED, player can combine numerous attacks for faster play.

◆◆ FURIOUS THE FANDANGO SECRET SLICES ◆◆

Despite power gauge level, if the sword gauge reachs MAX condition, press ↓↓+ A (or B) button to start Furious the Fandango Secret Slices. Commands vary depending on the character's type. (See page 8.)

EX

Combining the characteristics of "POWER" and "SPEED" swords types allows you to create the strongest possible sword as an "EX" sword type. The characteristics of this type are:

1) Able to sharpen up basic attacks well.
2) Able to use "Sublime Slash" and "Repeated Slices".
3) Able to use "Furious Fandango Secret Slice" when sword gauge is at MAX condition.
4) Able to use "Super Secret Slice", when power gauge becomes less than 1/4 or sword gauge reaches MAX condition.
5) Able to use "Hidden Secret Slice" when power gauge becomes less than 1/4 or sword gauge reaches MAX condition.

❖ Selecting the "EX" type decreases defensive power and makes the character more susceptible to being knocked unconscious. It also makes sword gauge slow to gain power.

✦✦ COMMAND OF FURIOUS FANDANGO SECRET SLICE BY TYPES ✦✦

Repeated attacks are possible by inputting the following commands right after Furious Fandango Secret Slice is invoked:

Type 1 (Kaede/Yuki/Akari/etc.)

After invoked ⟶ A•B•X

GAME MODE SCREEN

▢▢ MAIN MENU ▢▢
Press the START button at the Main Menu. (If the screen is playing the opening demo, press the START button to go back to Title screen, then press the START button again to go back to Main Menu)

STORY	This mode is for one-on-one battles where a single player goes against a computer opponent.
VS	A 2-player mode where teams for Player 1 and Player 2 battle it out.
TIME ATTACK	A mode in which a character races against the clock to beat all computer opponents.
TRAINING	Learn how to use all of your Samurai's abilities.
ART GALLERY	See illustrations from The Last Blade series.
DEMO VIEWER	See Demo screen from The Last Blade series.
OPTION	A mode for changing various game settings.

꘭ TIME ATTACK ꘭

*This mode challenges players to defeat as many opponents as possible within the time limit (a count of 90). The features of this mode are listed below.
*In this mode, the power gauge for the player's character does not decrease during opponent attacks.
*The faster a character is defeated, the lower the power level of the next succeeding computer character.
*When the remaining count falls under 30, power decreases and players can use the Super Secret Slices at will.

꘭ TRAINING MODE ꘭

Character Select Screen is displayed after selecting [TRAINING] at Main Menu Screen. Training begins by selecting your character (1P) and trainer character (2P). Set up description by displaying the training menu.
•• TRAINING MODE ••

Training Mode begins by pressing the START button. After Training Menu is displayed, you are able to select the next item.

COM ACTION 1	Determines the basic action of the computer character.
STAND	The computer character stands at a determined place.
CROUCH	The computer character stoops at a determined place.
JUMP	The computer character jumps up and down at a determined place.
COM ACTION 2	Determines the action of the computer character.
NO ACTION	The computer character does nothing.
ATTACK	The computer character repeatedly attacks with strong slice.
GUARD 1	The computer character guards itself in response to player action.
GUARD 2	The computer character receives player attacks, but guards itself when there is a break in combo attack.
GUARD 3	The computer character guards itself using the basic actions selected in COM-ACTION 1.
SWORD-GAUGE	Sets the level of the Sword-Gauge for the player character.
NORMAL	The Sword-Gauge increases with each attack made.
MAX	The Sword-Gauge is fixed at 100%. (Even when the gauge is exhausted, it quickly returns to 100%.)
CENTER	Returns the computer character and player character to the center of the screen (starting position) when "center" is selected in the start menu.
CHARACTER CHANGE	Use this mode to change the player character. (Return to the Character Select Screen).
EXIT	Ends the Training Mode.

▢▢ ART GALLERY MODE ▢▢

You will see the illustrations from The Last Blade Series in ART GALLERY Mode.

◆◆ ILLUSTRATION SELECTION SCREEN ◆◆

Directional button	Select the illustration by shifting the cursor.
A button	Confirms the selection and enlarges the item.
B button	Return to Title Screen.

◆◆ ENLARGED SCREEN ◆◆

Directional button	Scrolling screen.
A button	Displays the date of creation and application.
B button	Return to Illustration Selection Screen.
X button	Reduce the size of selected illustration.
Y button	Enlarge the size of selected illustration.
L Trigger	Shows previous illustration.
R Trigger	Shows next illustration.

▢▢ OPTION ▢▢

This mode allows various game settings to be changed as desired. After selecting "OPTION" menu on the Mode Select Screen, use the Directional button to select items and press the A button. Call up each Set-Up Screen to change settings.
LEVEL	Set the game difficulty.
GAME TIME	Change the time limit for rounds.
ROUND SET	Set the number of rounds in each game.
VIBRATION	Switch the separately sold Jump Pack ON or OFF.
FLASH	Set the flash ON or OFF on screen.
MASK	Move to Mask Mode on Menu Screen.
PAD CONFIGURATION	Set the configuration of controller buttons.
EXIT	Return to the Main Menu Screen.

◆◆ MASK ◆◆

This mode hides the character Power gauge that is normally displayed on the screen. Recommended for times when the rigors of normal game play just isn't enough!

MEMORY CARD

This game is a memory card compatible game [Visual Memory Unit (VMU) sold separately]. Save and load files such as game settings and the results of matches.

*By selecting "SAVE FILE" or "LOAD FILE", call up the screen that enables the selection of the port to use the saving and loading files. Check that the memory card has been inserted into port A and not B or other area.

□□ SAVE & LOAD □□

If the memory card is set up correctly, the Save Select Screen will show when game is over. Select [YES] with the Directional button and pressing the A button to confirm your selection to save the data. Push the Start button or the A button to confirm. Three blocks of open units are needed to save data. Once data is saved, the Load Select Screen appears before starting a game. By selecting [YES] with the Directional button and pressing the A button to confirm your selection, you can start playing the game where you saved.

*While saving a game file, never turn OFF the Sega Dreamcast power, remove the memory card or disconnect the controller.

□□ BURST-IN-PLAY VS. □□

Pressing the Start button of the unused controller (Port A or Port B) during play begins two-player VS. "burst-in play" battles.

□□ CONTINUE & GAME OVER □□

After losing a match, the continue countdown is displayed. Push the Start button before the countdown reaches "0" to call up the Continue Service Screen. By selecting [Yes], game resumes with the opponent character's power gauge at low level.
